CSC336 · WEB TECHNOLOGIES · FALL 2026

Assignment 2

Static, Responsive E-commerce Website

Tesla Vehicles

A student-built vehicle storefront inspired by Tesla's clean navigation, photography, and product-focused design.

STUDENT

Hussnain Ali

Roll Number: SP24-BCS-156

REFERENCE WEBSITE

Tesla

www.tesla.com

INCLUDED PAGES

Homepage product listing

Product detail page

PROJECT FEATURES

Bootstrap | Responsive Grid | HTML5 | CSS

1. Assignment Objective

Build a static, responsive e-commerce homepage and product-detail page using HTML, CSS, responsive layout, and Bootstrap. JavaScript is not required, so the buttons are intentionally non-functional.

2. Chosen Reference Website

Tesla — https://www.tesla.com/

Tesla was selected for its clean navigation, vehicle photography, and modern product-focused layout. This is an original student project, not an official Tesla website.

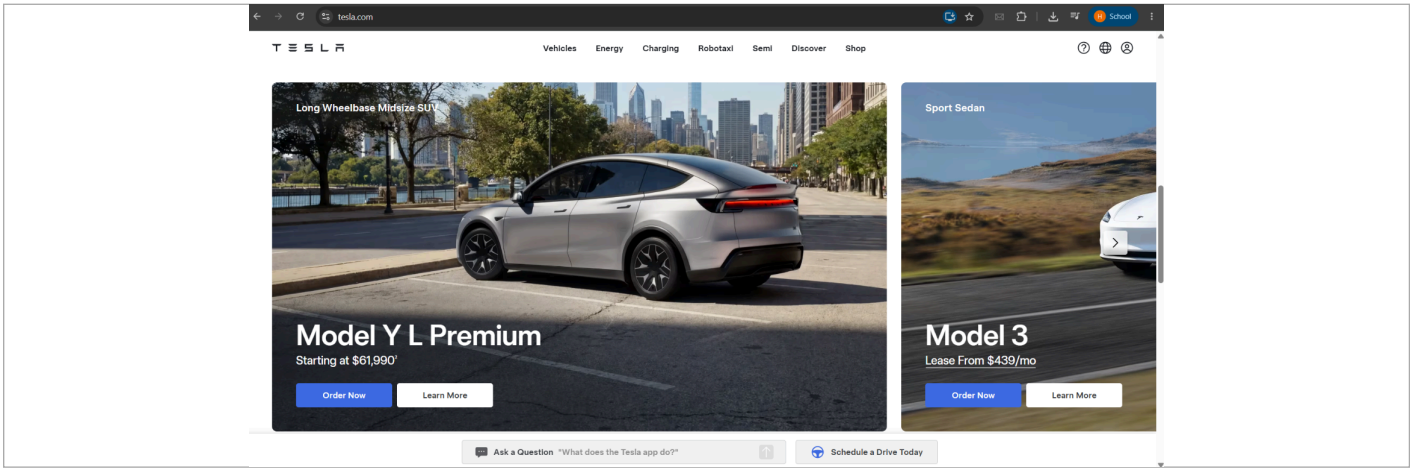

Figure 1 — Provided Tesla homepage reference screenshot.

3. Website Overview

Homepage

- Responsive Bootstrap navbar and cart icon.

Product Page

- Tesla Model 3 image, name, price, and description.

- Hero section and 15 Tesla vehicle cards.
- Local images, prices, Add to Cart buttons, and details links.
- Consistent footer.

- Quantity selector and non-functional Add to Cart button.
- Matching navbar and footer.

4. Technologies Used

HTML5 for semantic structure · **CSS** for styling · **Bootstrap 5.3** for navbar and responsive grid · **Local images** in the images folder.

5. Responsive Testing Evidence

5.1 Phone Width — 375px

Navbar collapses and products use one column.

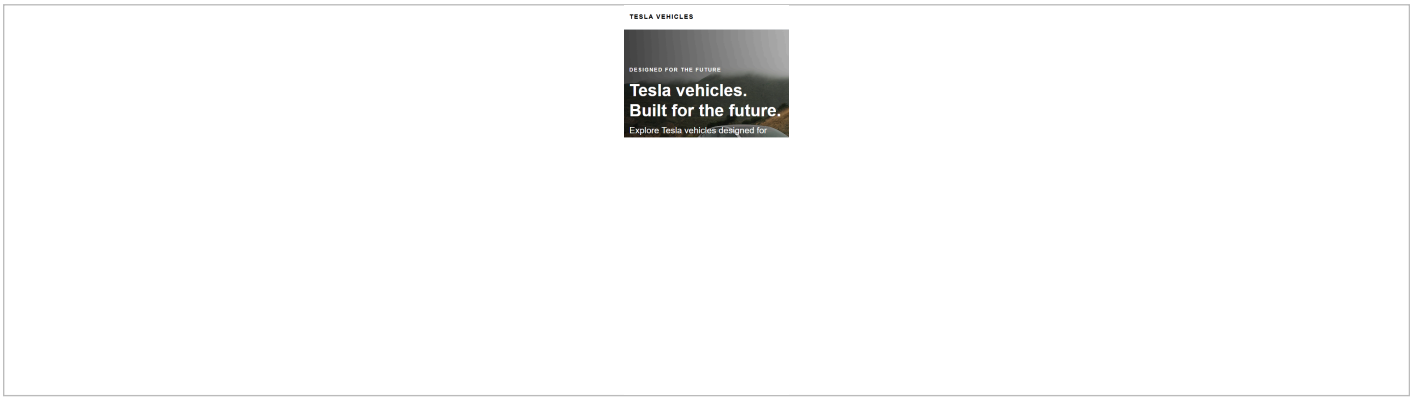

Figure 2 — Phone screenshot.

5.2 Tablet Width — 768px

Products reflow into two columns.

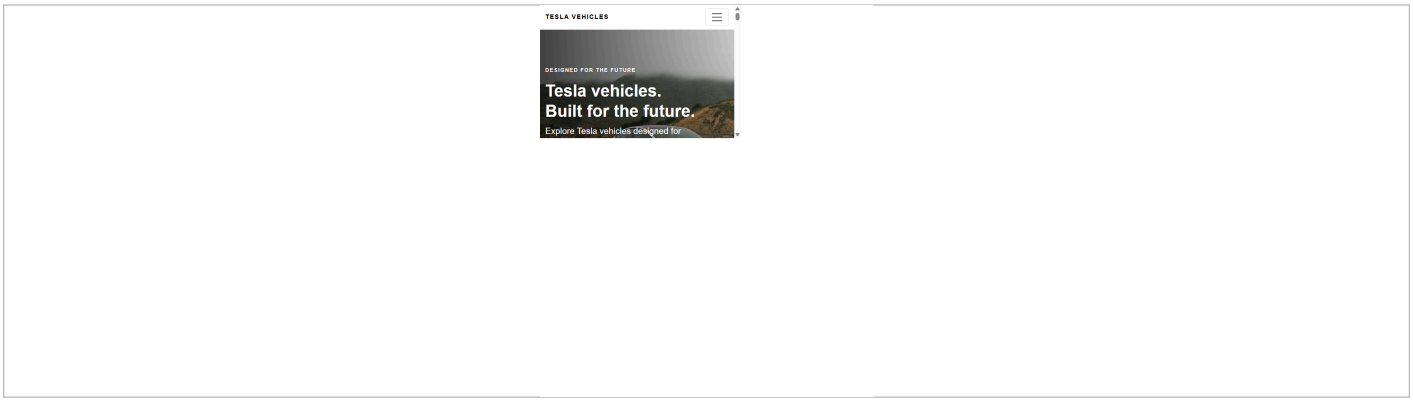

Figure 3 — Tablet screenshot.

5.3 Desktop Width — 1366px

Products display four cards per row.

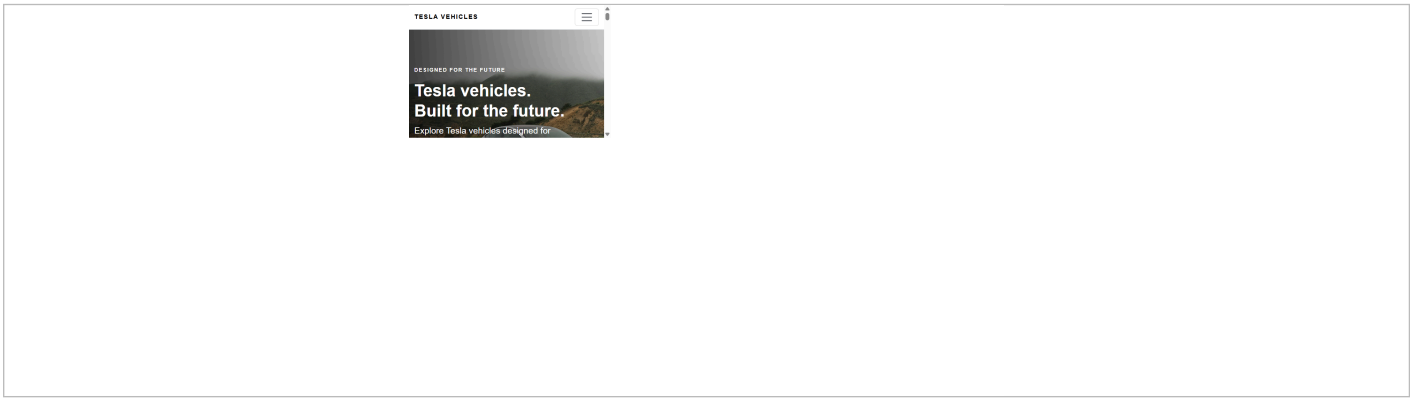

Figure 4 — Desktop screenshot.

6. How to Run

1. Open the assignment-2 folder.
2. Open **index.html** in a browser.
3. Open the Model 3 detail page using View details.

Vehicle and hero images are local. Bootstrap loads from its CDN.

7. Submission Files

index.html · product.html · styles.css · README.md · images/ · three responsive screenshots · this completion PDF.

8. Source Code — index.html
